Equipment for cylinder internal cleaning

Maintenance Center Equipment

MBK19-ICS80-A Is Designed For The Internal Cleaning Of Cylinders Up To 85 Cm Of Height And 27 Cm Of External Diameter Max 20 Liter. Cleaning Is Performed With A Fully Automatic Cycle Inside The Cylinder Shot-blasting Cabin. The Metallic Microspheres Assure A High-Quality Cleaning Without Damaging The Internal Surface Of The Cylinders Or Leaving Any Residue. The Metallic Microspheres Are Recovered And Separated From The Residual Of Cleaning By Means Of A Device (Cyclone) Allowing To Re-use The Microspheres In The Following Cycles.the Return Flow From The Separator Is Filtered By A Self-cleaning Filter, While The Solid Residuals Are Collected In A Container Easy To Be Emptied. Available Version: Power Supply with MBK19-ICS80-A-180 inverter: 400V 50Hz - 85/270 mm Min / Max Cylinder Diameter - Height 250/850mm Main Components • Cylinder Shot - Blasting Cabin • Separator • Shot - Blasting Unit • Self - Cleaning Filter • Microsphere Recover Pump
